The miracles of science™

Protection where you need it!

Types of application ...

- Clean room – *non critical environments*
- Electronics
- Pharmaceutical
- Laboratory
- Food processing

... and some specific applications:

- Printing Industry (sleeves)
- Nuclear (lab coats, hoods, sleeves)
- Agriculture (lab coats, jackets trousers and Sleeves)

DuPont Personal Protection has developed a range of TYVEK® accessories that complement its range of protective clothing products. These specific items offer protection against most workplace hazards that do not require category III protection.

Why TYVEK®?

Durability, Protection, Comfort

These new accessories have been made of TYVEK® because TYVEK® is a unique and versatile material that is = extremely light and soft but also very tough. What's more, it:

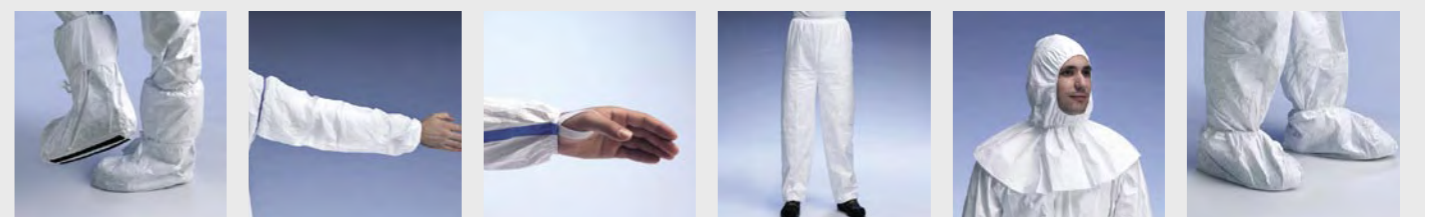

- is air and water vapour permeable, yet repels water-based liquids and aerosols
- acts as an excellent barrier against particles >1µm and fibres
- is low-linting
- and antistatically treated.

All these features help keep you safe while you work, and in clean room environments also help to prevent human contamination of products and processes.

Used individually TYVEK® accessories provide excellent protection where you need it. TYVEK® accessories can also be combined ie trousers and a jacket, providing a ventilated alternative to a coverall for application where category III protection is not required.

Combining accessories can also be economical for work where abrasion on specific areas is occurring (knees or sleeves). You can replace the accessory that is worn out during work while keeping the ones that are less exposed to abrasion unchanged.

TYVEK® accessories

TYVEK® accessories
